

Since 1996 until Today

MİRMAK, is founded in 1996 in İzmir/TURKEY and started producing industrial machines for automotive industry with ISO 9001:2008 Quality management system.

MİRMAK, follows the technological developments in order to increase the products and service quality of his customers.

MİRMAK, establishes long term business relationship by creating solutions for his customer's domestic and global needs to reduce the problems at minimum level.

MİRMAK, started to give service for aerospace and defence industry since 2013 in addition to automotive industry and now he is one of the leader companies in his field.

Engineering Services

- MIRMAK presents the most economical and optimum solutions suited to his customer needs.
- For this reason He uses softwares like ; Solidworks – Autocad ANSYS Structural - Pam-Stamp and technological hardwares with his experienced engineering staff .

Our Product Groups

1) STEEL WHEEL INDUSTRY

2) ALLOY WHEEL INDUSTRY

3) AEROSPACE INDUSTRY

4) AXEL HOUSING INDUSTRY

Machines For Steel Wheels

MİRMAK; is dealing with activities in 'Steel wheel production line' with his experienced staff as a leading company in Turkey over 30 years.

MİRMAK; establishes the Turn-key manufacturing lines and stand alone machines for production of the wheels of vehicles, such as ; forklift, lorry, agricultural vehicles and earthmoving vehicles.

MİRMAK; produces also the die-sets of the ring,disc and assembly lines according to the standarts of "E.T.R.T.O"

Machines For Steel Wheels

MIRMAK's applications for Steel Wheel Production;

- Stacking Units
- Bending Machines
- Spot Welding Machines
- Welding Apparatus
- Trimmer Machines
- Planisher Machines
- Edge Cutting Machines
- Rim Roller (Profiling) Machines (Open End – Close End)
- Expander
- Runout and Shimmy Test Control Machines
- Hydraulic Press (Disc, Rim and Assembly Operations)

Steel Wheels Production Lines

MIRMAK's Turnkey Production Line;

(MEFRO WHEELS TURKEY - BİLECİK)

- Forklift Rim Production Line
- Forklift Disc Production Line
- Forklift Side and Conical Ring Production Line
- Forklift Assembly Line

(AKOJANT - ANKARA)

- Truck, Commercial, Agro Front Rim Production Line
- Truck, Commercial, Agro Front Disc Production Line
- Truck, Commercial, Agro Front Assembly Production Line
- Agro Rear, Construction Vehicle Rim Production Line
- Agro Rear, Construction Vehicle Disc Production Line
- Agro Rear, Construction Vehicle Assembly Production Line

Machines For Alloy Wheels

MİRMAK; is also the leader company in the production of deburring machines and Underwater crack control machine for alloywheel production in Turkey by customized solutions.

Water Leak Test Machine

Machines For Axle Housing and Brake Shoe

MIRMAK; deals with finding customized solutions for the production of brake shoe and axle housing to in order to obtain high quality and high productivity .

Some of MIRMAK's applications in the production of Axle housing and brake shoe

- Cooling Tunnels
- CNC seam welding machine
- Brake Flange welding machine
- Vertical bore and surface finishing machine
- Ring and cover seam welding machine
- Vertical Multipin Drilling machine
- Multispindle brake flange drilling machine
- Pin Boring apparatus
- CNC Brakeshoe machining center with 4 station and rotary table

C

- **MİRMAK is a solution Partner for aerospace and defence industry starting from the offer stage up to prototype production stage (FYI) of the Aircraft and motor sheet metal processing.**
- **MIRMAK deals with Turn-Key solutions (Starting from part drawings , process design, die, prototype and serial production stages).**
- **In the First stage Process Design is done in MİRMAK, after the arrival of technical drawings of the required parts.**
